

BIG BUILD, BIG DISASTER- YOU'RE AT RISK!

IF THERE'S A FIRE IN A VICTORIAN TUNNEL,
FIREFIGHTERS CAN'T SAVE YOU - NO GEAR, NO SAFETY.

BIG BUILD, BIG DISASTER - YOU'RE AT RISK!

NO LONG-DURATION BREATHING APPARATUS

Firefighters are being sent deep into tunnels with only 20 minutes of air. Our long-duration breathing sets have expired and not been replaced - putting firefighters and the community in danger.

OLD AND FAILING FIRE TRUCKS

Over 42% of fire trucks are more than 15 years old, breaking down daily on the way to emergencies.

Unreliable trucks cost lives.

NO TUNNEL-SPECIFIC TRAINING

Firefighters have not received proper training or live drills for the Metro or West Gate tunnels. Firefighter crews will be forced to respond blind in the most dangerous environment we've ever faced.

EMERGENCY SERVICES TAX - BUT FUNDING CUT

Victorians are already paying double through the new Emergency Services Tax - yet frontline fire services have been cut. Firefighters are being asked to protect major new infrastructure and tunnels with expired equipment, aged and unreliable trucks, no functioning central radio communications and no proper funding.
